

## HILLSDALE STANDARD.

On hearing the Marriage of Sarah

She's married and was it for love?  
Her affianced, oh! did he get  
Her sons rich affection, above  
All others, she ever had met?  
Did her heart beat quick at his coming?  
Did she sit at her window below,  
And watch with a sigh, his returning?  
"I would very much like to know."

Or have others, this drama planned,  
And made her, the part of their will?  
Has a stern old father's command  
That left it for her, to fulfill?  
Has her heart's dear devotion, been given  
To another, with pledges, in tears—  
By all that was holy of Heaven?  
Oh! is there no room left for fears?

I would that I too had stood there,  
When that Orange wreath o'er her brow  
Hav friends there—and that one of prayer,  
As she breathed, that night holy vow,  
Ah not as it was; it was well,  
That Ocean, and lands, intere end,  
If possibly, that bosom a swell,  
Spoke forth what these dark hints, have  
meant.

For she was most lovely, in truth,  
And pure, as a midnight star's ray  
And in all the sweetness of youth,  
And "fresh as a morning in May."  
And if on her brow, had been bloom,  
Her eye had been dry—but no more,  
May her waking, e're pleasantly close  
And her days, be as bright as of yore.

Hillsdale, August 6, '86. C.

### The Cranberry.

We have received a circular from Sullivan Bates, Esq., of Massachusetts, on the subject of the cranberry culture, a part of which we copy. Mr. Bates we understand to be engaged in growing this fruit.

"Fellow-Citizens: As much has been said on the subject of the 'Cultivation of the Cranberry,' and as many communications of inquiry on that subject are daily received by me, I propose to give such information to the public as my experience will permit.

"First. Select a situation for your cranberry field on a clay soil, on such as is not liable to bake, or on a dark loam soil, or on any moist soil where there is a mixture of sand. Most of our reclaimed lands, such as can be made moderately dry, are well adapted to grow the cranberry. In fact, most soils that are natural to grow the potato are suitable for the cranberry; yet the first mentioned soils should be preferred. I think there are portions of most of the farms situated in the Middle States and their vicinity that are well adapted to grow the cranberry; and I should propose to all desirous of commencing the business, to put their plants on different parts of their soil, and by so doing the better soils may be ascertained. As far as I have observed, there are three varieties of the cranberry, viz. the barberry, the cherry, and the bell. I have never known any variety of the berry that would naturalize to dry soil except the bell cranberry. This species grows much in the form of an egg. When in the wild state, it is inclined to grow on the borders of cranberry bogs, spreading its way to upland soil. This species is much larger than the others, in its wild state. Persons engaging in the cultivation of the berry, should commence with the last mentioned species; and by commencing with those that have been cultivated and naturalized to a dry soil, they will much sooner accomplish their object, and with much less trouble and expense, as the plants multiply and increase abundantly. Persons commencing with one or two thousand will be able to obtain plants of their own raising sufficient to transplant acres, in two or three years.

"Second. Prepare your soil the same as for sowing grain, by plowing, harrowing, and making your soil even. Then mark it out in drills, 18 or 20 inches apart. Hoe them slightly at first, till the roots become clinched, and afterwards no other cultivation is needed. The plants may be expected to run together and cover the whole soil in two or three years. The cranberry grown by cultivation usually yields from 150 to 400 bushels per acre; its fruit is two or three times as large as the wild fruit, and of a beautiful flavor; it readily keeps sound from the harvest time of it to the time of harvest again. The fruit is generally gathered in September. It is gathered with wire-toothed rakes, made for the purpose. One man will generally gather from thirty to forty bushels per day, with the aid of a boy to pick up the scattering fruit.

"Persons wishing for plants can have their supply of the subscriber—price, \$7 per thousand; for less quantities than one thousand, the rate of eight dollars per thousand, will be charged. The plants will be carefully packed in meadow moss and well boxed, which will enable them to go a great distance in a fresh state.

"The proper time for fall transplanting is in October and November; for spring, from the opening of the same till about the 10th of May. Persons wishing for plants are requested to send their orders as early as the first of fall transplanting, and during the winter for spring.

From the Michigan Farmer.

Reclamation of Marsh-Meadows.

The first step in reclaiming one of our natural meadows; is of course, to produce the degree of dryness desirable, by ditching. To accomplish this, it is generally found necessary to cut marginal as well as centre ditches, in order to cut off the sources of springs, flowing in from the upland. It happens that springs rise in the interior of the marsh, fed by an underground channel; in which case a side ditch will be needed passing from the spring to the main ditch.

It is very possible to drain too thoroughly. If made very dry at once, before the soil has had time to settle, and while it yet retains its spongy texture, neither the native wild grass, nor the seed of cultivated grass will grow successfully. The ditches which are necessary to carry off the surplus waters of the daily spring, would, if left open through the droughts of summer, produce this excessive dryness. Hence it is well, so soon as the requisite degree of draining has been accomplished, to close up the mouths of

the ditches, and prevent the further escape of the water. We refer now to marshes recently reclaimed, and which have been brought under cultivation. After acquiring some compactness by the natural process settling, after the superfluous waters shall have been removed, which process is accelerated by cultivation, or by the trampling of cattle when depastured; this precaution may become unnecessary.

After draining sufficiently, if it is desired to stock down with the cultivated grasses, it is only necessary to burn, (if the meadow has not been mowed,) sow the seed of timothy or red-top, or both, and securely the turf thoroughly with a sharp harrow. As with beings of a higher order, the new race will gradually elbow out the aborigines. If cultivation is the object, the qualities of the soil are greatly improved after plowing, by a top dressing of lime or ashes, to neutralize the acids which have been accumulated during the long submersion; for such soils are literally, as well as in common parlance, *sour*. They are said, however, to produce good crops of oats without such application. The most proper crops are oats, corn, and roots, especially potatoes and ruta bagas.

Whether marsh meadows are susceptible, after two or three years of cultivation of being carried through a regular rotation of crops, like the upland, we are not sufficiently informed to say. We know one, which a few years since was grown over with wild grass, scattered tamaracs and clumps of willows, over which, since draining, white clover is spontaneously spreading. We see no reason why red clover might not also be successfully introduced. For wheat they must be long unsuitable, from the excess of vegetable matter; and all kinds of grain would be subject to being laid, as well from too great rankness of growth, as from the lack of silicious matter.

Some city poet has worked out the following elegant specimen of literature and rhyme:

O! Sally 'tis my chief delio  
To see upon your eyes my tale,  
My love for you, by good express  
The lay I file for rum and lassie.

IMPORTANT TO LABORERS.—The Newburyport Herald says:

A letter from an American, who is making a tour of Austria and Italy, says railroad laborers there receive 25 cts. a day and consider themselves well paid. Women, who perform nearly all the manual drudgery of agriculture, the young men being in the army, receive 10 cents a day. The roads are kept in repair by women, who break the stone and mend the roads for about 5 cents a day. The general fare is a piece of rye bread for breakfast; for dinner a soup-plate as substantial as a mixture of warm water and salt, a boiled sausage, and rye bread; in the evening their frugal meal is soiced by the company of beer, which is used in excess to the exclusion of tea and coffee.

Now, it is this kind of labor, and with such wages, the Loco Foco here wish the America to enter into competition with. Who's ready for it!

An old maid, in Liberty, who would wish to be considered a young maid, has brought an action for damages against the editor of the village paper for saying that she was one of the oldest and most respectable residents of that place.

"FEVER & AGUE," "HOWARD'S IMPROVED TONIC MIXTURE," "THE BANE AND THE ANTIDOTE."

I hereby certify that several persons under Medical Treatment for INTERMITTENT FEVER, (or FEVER & AGUE) within my observation and direction, have been cured by the use of "HOWARD'S IMPROVED TONIC MIXTURE," after every preparation of Peruvian Bark, (Quinine) &c. &c., and have tried in vain!

NATHANIEL P. CUSHMAN M. D.,  
Washington City, District of Columbia.  
Thousands of like certificates have from time to time been published.

1,500,000 cases of Fever & Ague have been cured by ROWARD'S

"IMPROVED" TONIC MIXTURE!!!  
WITHIN 15 YEARS!!!

However unimpaired this statement may at first appear, yet the FACT may be demonstrated by the simple rule of three, for we estimate by reference to the "Manual of the Trade" that Five Hundred Thousand Bottles have been made and distributed over the country during the last fifteen years!!!

Well, it is well known to the Agents, especially in the Western States, that whole families of 5 or 6 persons have been cured by one single bottle. In a vast number of instances, one bottle has cured 1, 2, 3, 4, 5 and 6 persons! The average here would give three cases to every bottle, amounting to the astounding number of 1,500,000 cases of this "baneful complaint" cured by this "invaluable remedy"!!!

Now, "common sense" dictates the propriety of resorting at once to this old, favorite, well-tried and sterling remedy, and of avoiding all vulgar and insignificant nostrums.

G. W. UNDERWOOD, Agent in Hillsdale,  
Inventor & Proprietor Dr. J. H. ROWARD, Phila.  
Graduate of the University of Pennsylvania.

THE GENESEE FARMER.  
VOL. VII, FOR 1846.

Each Number of this Volume (which commences in January, 1845) contains of SIXTY-FIVE PAGES, printed on NEW TYPE, and GOOD PAPER, and embellished with appropriate ENGRAVINGS. The paper will make a handsome volume of about three hundred pages, suitable for binding at the expiration of the year. No reasonable expense or effort will be spared, but every proper exertion used to make it acceptable to the Farming community, by rendering it at once the cheapest and best paper of its size and kind in the Union.

Its Editorial Department will continue under the supervision of Dr. DANIEL LEE, its present and former Editor. Its Horticultural Department will be conducted by F. BARRY, Esq., an experienced and practical Horticulturist.

TERMS, same as heretofore—FIFTY CENTS A YEAR, in advance; 5 copies for \$2; 6 copies for \$3.

## Latest from Mexico.

Arrived by special Express from the Head Quarters of the Army of Occupation, a large number of Baggage Waggon, containing any quantity of **DRY GOODS, GROCERIES** (items too numerous to mention,) consigned to **J. J. LEONARD.**

All of which will be disposed of on favorable **Terms.** Any one wishing to dispose of the **ROOT OF ALL EVIL**

can Exchange the same, at the sign of the "Red Flag," Two Doors above H. S. Platt & Co's. Hardware Store, for the necessities and conveniences of Life.—  
**COFFEE** from 10 to 15 cents per pound, the Simon Pure article;  
**TEA** that will do its own Puffing, at from 5c. to 10c. per pound,  
**TOBACCO**, from 18 cts. to 25c. 6d.

Summer and Fall Goods to be had by carrying them away—leaving a little **Butter or Eggs** for fear you may have too heavy a load.  
**Don't you smell new Leather?**  
**ROOTS and SHOES**, of all sizes, and warranted to fit, at the price of the raw material.  
Come unto me, all you that are heavy laden with **CASH or PRODUCE**, and I will relieve you of your burthen.  
June 30, 1846.

**J. J. LEONARD.**

**G. W. UNDERWOOD,**

Has just received from New York and the Manufacturers, a full assortment of goods in his line, consisting of

**DRUGS, MEDICINES, PAINTS, OILS, GLASS, DYE-STUFFS,**  
and a choice selection of

**FAMILY GROCERIES;**

Which he offers to the Citizens of Hillsdale, and adjoining Counties, on the most favorable terms. His department of **DRUGS & MEDICINES**, comprising every article required in the Medical Practice of the country—Selected with great care, from one of the first Drug Houses in New York, together with a full assortment of **INSTRUMENTS &c.**—such as **TRUSSES, SUPPORTERS, CATHETERS, SYRINGES, THUMB-SPRING & GUM LANCETS, CUPPING GLASSES, APOTHECARIES SCALES, WEDGE-WOOD MORTARS, PALLET KNIVES, SPECIE JARS, TINCTURE BOTTLES, LABELS, &c. &c. &c.**

Physicians and others, are respectfully invited to call and examine—both quality and prices. Every article in the line of **DRUGS & MEDICINES**, together with **Painters & Glaziers' TOOLS.**

Clothiers supplied with **Dye-Stuffs** in large or small quantities; in addition to which I would give notice, that I will always be supplied with the choicest of Family Groceries, where all who would be sure of good articles, at moderate and uniform prices, can be supplied. In connection with my assortment of Drugs and Medicines, I have supplied myself, with choice articles of

**BRANDY, GIN, PORT AND MADERIA WINES,**  
Which I will sell to all who may want as Medicines, and to them only.

**N. B. Medicines delivered at all hours of the night.**

**HILLSDALE, July 1, 1846.**

**W. H. CHANDLER,**

DEALER IN

**Dry Goods, Crockery, Iron Steel and Nails,**  
*Glass, Boots, Shoes, Leather, Medicines, etc. etc.*

Agent for Holmes' Edge Tools, Chandlers Scythes—also

## Extract of Lungwort.

**THE GREAT REMEDY FOR CONSUMPTION & LIVER COMPLAINTS.**

**TO THE PUBLIC.**

There is not room in a newspaper advertisement to publish the numerous certificates of cure, but the invalid is referred to a medical pamphlet to be had of any of the Agents gratis. Such proof as we are constantly laying before the public must convince all that.

**DR. LARSON'S EXTRACT OF LUNGWORT** is the only medicine in the world that will cure all who are predisposed to Consumption, Liver Complaints, or troubled with Coughs, Colds, Asthma, Pleurisy, Spitting of Blood, Pain in the Side and Chest, Difficulty of Breathing, Tightness across the Chest, Palpitation of the Heart, Bronchitis, Throat complaints, and all affections of the Pulmonary Organs. It is not sufficient, we will refer any one to others, who (at the date of the above) are now using this article in a variety of protracted Lung and Liver Complaints.

All the certificates shown to the public, prove conclusively, one thing—that the **VEGETABLE EXTRACT OF LUNGWORT** is possessed of certain powers, in healing the lungs and restoring energy to those who were supposed to be fast sinking into the grave, over every other remedy, ancient or modern.

And why not? It is a medicine that is not the work of a day—the compound of a drug shop, having only for its object a sale. It is a remedy that owes its existence to nature's source, and all the preliminary symptoms of consumption, Quackery, probably, would not new life into a skeleton, provided you would believe it, at least the inventors of some of the *VERMIN* popular remedies would induce you to believe so, if possible. It is to put in the place of such stuff a remedy really of use to mankind, that the **VEGETABLE EXTRACT OF LUNGWORT** was made.

The study of years—the proper proportion of the ingredients—their effect upon the different systems, and the stage of disease in the patient—all these were in "mind's eye" of the physician who formed this medicine. He knew that to make something really useful as a remedy, study and observation were necessary, and he failed not to devote all his attention to the purpose. He has succeeded—the **VEGETABLE EXTRACT OF LUNGWORT** has taken its stand, and beyond the leading medicines of the present time, as the only true indicator of pulmonary CONSUMPTION extant. This is true and certain—true, because susceptible of proof—certain, because its power and its usefulness, in saving hundreds from death cannot be controverted.

**C. J. ROOSEVELT.**  
Sole Proprietor, 27 Broadway, Albany.  
The undersigned have been appointed by the proprietor, General Agent for Michigan, for the sale of the invaluable medicine above named and are prepared to supply Druggists, Physicians, at wholesale or retail.  
Adrian, Nov. 20, 1844.

**P. B. TRUAX & Co., Druggists.**  
S. HOPKINS, Druggist,  
Sole Agent for Hillsdale.

**Worms Kill Thousands.**  
CHILDREN are most subject to them, but persons of all ages are liable to be afflicted with them. Bad breath, paleness about the lips, flushed cheeks, picking at the nose, wasting away, loss of appetite, and in boys, joints or limbs, distended, painful, dreams, moaning and sometimes a voracious appetite, are among the symptoms of worms. Many are diseased for months for some other imaginary disease, when one box of Sherman's Worms would effect a cure. Dr. Ryan, corner of 21st and Broadway, cured a man of worms, who was reduced to a skeleton, and by only one box of Sherman's Worms. He is now as fat as an African. Mr. Hon. B. H. Beardsley has saved the life of one of his children by them. The sale of over 2,000,000 of boxes has fully tested them. They are the only infallible worm destroying medicine known. What family will be without them?

Consumption, Coughs, Colds, Whooping Coughs, Asthma, and all affections of the lungs, will find a healing value in Sherman's Worms. They cure the Rev. Richard De Forest, the Rev. Mr. Streeter, Jonathan Howarth, Esq., and that worthy old hero, Leonard Rogers, from the consumption's grave. They cured in one day the Rev. Mr. Dunbar, an Rev. Mr. Handcock, Wm. H. Attree, Esq., of disordered coughs. They are the pleasantest cough medicine and cure the source of any known remedy.

Headache, Sea-sickness and Palpitation, relieved in from five to ten minutes by Sherman's Camphor Lozenges. Persons attending crowded rooms or travel find them to impart buoyancy of spirits and renew their energies. Those suffering from too free living will find a few of the Lozenges to dispel the horrors and lowness of spirits. Mr. Krauth, of the Sunday Mercury, has repeatedly cured him of severe headache by them. Captain Chadwick, of the packet ship Wellington, has witnessed their efficacy in a great many cases of sea-sickness. They operate like a charm upon the agitated or shattered nerves, as Sherman's Peppermint Flavour does upon rheumatic humors, pain or weakness in the side, back, breast or any part of the body. Mr. H. G. Daggers, 30 Ann Street, Henry R. Goulding, 321 Chatham Street, Mr. J. H. Rogers, Esq., and a multitude of others have experienced the wonderful effects of these Lozenges. Price only 12 1/2 cents. Caution is necessary to see that you get the genuine Sherman's Lozenges and Flavour, as there are many worthless articles attempted to be palmed off in place of them, by those who would trade with your life for a shilling.

Agents for Sherman's Lozenges are "W. H. Chandler, Hillsdale; Ralph & Co., Joncaville; D. K. Underwood, Adrian.

**HOLMES' BROAD AND HANDAXES**, a large assortment and warranted by the dozeonor otherwise, for sale at CHANDLER'S.

**WANTED.**  
9999 lbs. Beeswax for which the highest price will be paid in Goods or Cash by J. W. KING.

**WANTED.**  
9999 lbs. Beeswax for which the highest price will be paid in Goods or Cash by J. W. KING.

## SAND'S SARSAPARILLA.

FOR THE REMOVAL AND PERMANENT CURE OF ALL DISEASES ARISING FROM AN IMPURE STATE OF THE BLOOD, OR HABIT OF THE SYSTEM.

This medicine is constantly performing almost incredible cures, of diseases arising from impurities of the blood and general system. It has arrested and cured numerous cases of scrofulous affections, diseases of the skin, diseased liver, painful enlargement of the knee, elbow, and wrist joints, Chronic rheumatism, sore throat, chronic constitutional diseases, and various other diseases arising from impure secretion. In this preparation are strongly concentrated all the valuable medicinal properties of Sarsaparilla, on which its activity depends, compounded with other remedial agents, selected from the vegetable kingdom, the whole strength of which is extracted on an entirely new principle, which has cost many years labor and much expense. The great object is now triumphantly accomplished in the production of a remedy possessing a controlling power over supposed incurable diseases, heretofore unknown in the history of medicine.

The testimony of those who have been cured by its use with their residences, has been published from time to time, and were it desirable a mass of the most overwhelming testimony could be brought forward, proving most conclusively its inestimable value, as an active and curative medicine in the above diseases. The afflicted, or those who may have given up in despair, and all who are interested, are invited to make a trial of this valuable medicine, or to call on those who have come forward and borne public testimony of its priceless value to them, and safely demonstrate individually of its power in arresting and curing disease, and of what it has performed for others.

The following is an extract from a letter received, and a specimen of those to hand daily:  
GALLATIN Tenn. Feb. 27th 1844.

Messrs. A. B. & S. Sands.  
Gentlemen—I have received a letter from my father in Russellville, Ky. who wishes to purchase some of your Sarsaparilla. I have no doubt he can be the means of selling a great deal of your medicine, a wonderful cure in his family. Last December I was sent for to see my sister before she died, she having been in poor health for some two or three years, and at the time I went over to see her, she was at the point of death with the scarlet fever and a dangerous affection of the bowels, from which her physician tho't she could not possibly recover. I carried over with me a bottle of your Sarsaparilla, and with the consent of her physician she consumed it, and she recovered. I remained with her three days, and left her rapidly improving. Her husband sent a boy with me for more of the Sarsaparilla. I sent one dozen bottles which I believe will effect an entire cure.

To that effect, and wishes through me to procure an agency for selling your valuable medicine in that neighborhood. Respectfully  
J. M. OWENS.

Further proof of the efficiency and virtue of this valuable Medicine in Rheumatism:

OSCEOLA CROSS ROAD, Ga. August 24, 1843.  
Mr. G. R. Hendrickson, Savannah—Dear Sir—Having just recovered from a severe chronic Rheumatism, with which I have been afflicted for many years and having used various remedies without any success, I am now induced to write you in respect to Sands Sarsaparilla, to which valuable medicine I owe my present enjoyment of health. The pain of ever recovering from this disease and while laboring under the most acute agony and pain, I was persuaded to try the Sarsaparilla, so highly recommended for the cure of Rheumatism. I tried one bottle, and the little benefit derived from that one induced me to give it a fair trial, which I did by sending down to you for half a dozen bottles; and am now happy to say I find myself for the first time in twelve years, well and able to attend to my necessary duties. I send you this through a feeling of gratitude due this excellent medicine, and a sense of obligation to my fellow beings, that those similarly afflicted may be induced to try this valuable remedy. Sands Sarsaparilla.  
Yours with respect DANIEL FOX.

For further particulars and conclusive evidence of its superior value and efficiency, see pamphlets which may be obtained of Agents.  
Prepared and sold Wholesale and Retail by  
A. B. & S. SANDS, Wholesale and Retail by  
79 Fulton St. New York.

Sold also by Druggists generally throughout the United States. Price \$1 per bottle—six bottles for \$5.  
The public are respectfully requested to remember it is *Sand's Sarsaparilla* that has and is constantly achieving such remarkable cures of the most difficult class of disease to which the human frame is subject; therefore ask for *Sand's Sarsaparilla*.  
For sale by G. W. Underwood, Hillsdale and Newell, Hillsdale Mich.

**The Wonderful Success.**

Which Dr. Folger's Olosomian, or All Healing Balm has met with, not only in its sale, but also in the cures which it has effected, in persons who were in a condition, has convinced the

**Sceptical of its Extraordinary CURATIVE PROPERTIES** and establishes its claims to the name of the **Great Remedy.**

THE question is no longer asked, "Can Asthma be cured?" It has been ascertained that settled within the last two months that Folger's Olosomian will produce a cure quicker than any other remedy in the world, and references can be given to persons in and out of the city, who have experienced its wonderful virtues, who had been for years all other remedies without effect.

Mr. Wilson, a Bricklayer, residing at Hoboken, N. J., tried every remedy which he could hear of for the relief of asthma, and had spent more than \$100 in endeavoring to procure help, but in vain. He commenced using the Olosomian, January 21st. The first dose he took gave him relief, and two days afterwards he was enabled to say that the small quantity of this remedy which he had taken had done him more good than any and all the medicines he had ever used in his life.

Mrs. Bell, the wife of Robert P. Bell of Morrisstown, N. J., who severely afflicted with Asthma, was given up by her physicians. She was removed to the sea-shore in the hope of obtaining relief from her distressing symptoms, but with no benefit. One bottle of the Olosomian so far relieved her that she was able to get up from her bed and dress herself, a thing she had not done before in months, and she has now returned to her residence in Morrisstown, with every prospect of a permanent recovery.

**INCIDENT CONSUMPTION** yields to its effects. It soothes troublesome cough, and gives refreshing slumbers to the weary—it allays the pain in the side, and in the breast and enables the person to expectorate easily while it entirely restores the secretion of the system and expedites returning health.

James B. Devoe 101, Reade street, had long been afflicted with a severe asthma, and was accompanied with a sort of hacking cough; he raised matter frequently. He had tried various remedies without any beneficial effect. His shortness of breath and pain in the side continued to increase. He used one bottle of the Olosomian, and is restored to health.
